Professional Learning Communities

We will be answering 4 questions throughout the year:

★ What do we want our students to know and be able to do?
★ How will we know if they learned it?
★ What will we do if they don’t learn?
★ What will we do with those who already have learned or have learned it quickly?

Please remember this is a process 😊

Question #1 - What do we want our students to know and be able to do?

Develop a list of reading and math expectations for a benchmark child at your grade level in order to be promoted to the next grade level.

- You will have 3 months to complete this list as a grade level.
- You should meet twice a month during common planning time.
  - Please submit the time and place you will be meeting.
  - Please submit notes at the end of each meeting.

Thank you for working on these important tasks that will lay the groundwork for ensuring high levels of learning for all students!
